

## Homework 2

**Author: Constantino Mora**

**Date: Nov. 9th, 2021**

**Using the blockchain explorer, have a look at the following transactions, what do they do?**

**0xb9316bbbae1cd21cd824de8651c72582261230724b1957abdeb466aa96a359c9  
0x4fc1580e7f66c58b7c26881cce0aab9c3509afe6e507527f30566fbf8039bcd0  
0x552bc0322d78c5648c5efa21d2daa2d0f14901ad4b15531f1ab5bbe5674de34f  
0x7a026bf79b36580bf7ef174711a3de823ff3c93c65304c3acc0323c77d62d0ed  
0x814e6a21c8eb34b62a05c1d0b14ee932873c62ef3c8575dc49bcf12004714eda**

A: According to the logs in etherscan.io, these transactions interact with Contract Addresses, and in the Input Data they put more information for the contract call.

**What is the largest account balance you can find?**

A: 0x00000000219ab540356cBB839Cbe05303d7705Fa, according to:  
<https://etherscan.io/accounts>

**What is special about these accounts :**

**0x1db3439a222c519ab44bb1144fc28167b4fa6ee6**

A: ^That's Vitalik Buterin's address.

**0x00000000000000000000000000000000dEaD**

A: This is Black Hole, an address commonly used by projects to burn tokens.
